**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### **DETAILED ACTION**

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/21/04 has been entered.

#### ***Drawings***

The substitute sheet/figure 1 has been entered. Applicant's cooperation is greatly appreciated.

#### ***Specification***

The amendment to the title has been entered.

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: "partial error signal" and "partial periodic signal".

#### ***Claim Objections***

Independent claim 7, lines 1-6 – introductory phrase does not read correctly – i.e., "The for servo controlling ...", this phrase doesn't read correctly in idiomatic English. Further correction is required.

#### ***Claim Rejections - 35 USC § 112***

1. Claims 1,2,7,11,12 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

As disclosed, a pulse – duty control unit/element 33 is interposed between the pulse producing unit and the remainder of the apparatus. However, such is not claimed in the submitted claims. Hence the claimed invention is incomplete, i.e., lack of correspondence between the disclosed operational system and the present claims.

Art Unit: 2653

2. Claims 1-2,7,11,12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In particular, independent claims 1 and 11 recite in lines 20-25 and lines 22-25 desired result(s), wherein clauses, that refer back to "a partial error signal"; however, there is no positive support for a source for such a "partial" error signal. Hence, it is not clear as to where this error signal is derived/created so as to be part of the desired result.

Independent claim 7 lines 20-25 recite desired results, wherein clauses that require a "partial periodic signal"; however, there is no positive support for such a signal in the remainder of the claim.

The dependent claims fail to clarify the above and fall accordingly.
